## Bureau Score Details

Bureau scores use available Equifax's bureau data to calculate a risk estimate. The primary purpose of the scores is to predict the likelihood of a future adverse event being recorded in the bureau file held by Equifax.

A score is a statistical rank ordering tool only and as such should always be used in conjunction with your organization's credit policies and procedures and other relevant information you may have about the company or business. A score should not be and is not intended to be the sole basis for making a decision about whether or not to deal with a particular company or business.

## Bureau Score Result

Relative Risk: 3.83 times better than Equifax average.

## About The Credit Score

The credit score for this company has been calculated using Equifax's Company/Business scorecard. The relative Risk position indicated is based on a comparison with the Equifax population. The odds of recording adverse credit information within 24 months of an enquiry are 19:1

### Explanation of Key Contribution Factors

Shopping Pattern: The type and frequency of credit applications can impact the risk assessment. Research shows that organisations with higher credit risk typically shop around more (and more often).

Company Information:	Information about company - the number and the age of director(s), industry characteristics, time since incorporation and security information can be all indicative of increased / reduced risk.
Age of File & Pattern of Enquiries:	The spread of credit activity as it relates to the age of the company will impact risk assessment
Industry Characteristics:	Research shows that risk is related to the type of credit provider being approached
Director Derogatory Information recorded:	The existence of derogatory information (court judgements, bankruptcies, defaults, external administration segments) on the Director(s) file is a very powerful indicator of increased risk.
Default Information Recorded:	The existence of derogatory information (court judgements, defaults, external administration segments) on the Company file is a very powerful indicator of increased risk.
Court Writ Information Recorded:	The existence of court writ information on the Company file is a powerful indicator of increased risk.
